Fruit enzyme cleaner

A lot of food waste, including fruit peels, goes from your kitchen to landfills. By making fruit enzyme, your child can learn to reuse fruit peels and make organic cleaning agents.

Things you require:

- ❖ Used airtight plastic container
- ❖ Jaggery/brown sugar
- ❖ Fruit peels

Time taken: 1 week

How to: Put fruit peels collected over 2-3 days into an airtight plastic container. To this, add a teaspoon of powdered jaggery or brown sugar. Let it sit in a cool, dry corner for a week. The mixture will start fermenting. Open the lid of the container every other day to release the gas let out by the peels. After a week, you can filter the liquid and use it as a household cleaning agent.

Note: - Share the pic of this activity in whatsapp group on 4th June 2021 between 5:00 PM – 6:00 PM.
